SKILLS

- Cyber security basics
- Networks
- HTML
- CSS
- Angular
- TypeScript
- BootStrap Framework

PROFILE

Self-motivated and hardworking fresher seeking for an opportunity to work in a challenging environment to prove my coding skills and utilize my knowledge of various databases in the growth of the organization.

INTERNSHIP

Ui developer - intern

Garrett Advancing motion   JAN 2023 - JUNE 2023

Reusable component library

- Developed a UI component library using Angular
- Explored component-driven cloud platforms to optimize UI component development and enhance team collaboration.
- Emphasized modular and reusable component design to drive efficient UI development practices.
- Leveraged cloud-based solutions for scalable and collaborative UI development workflows.

ACADEMIC PROJECTS

E-doc Provider

- Developed a prototype of a web application within the college premises.
- The web application aimed to assist college students in downloading required documents like bona-fide certificates, permission letters, etc.
- Implemented a feature that allowed students to request these documents from the college admin.
- The prototype facilitated a streamlined process for students to access necessary paperwork by submitting requests through the web application.
- Contributed to enhancing administrative efficiency by automating document retrieval and reducing manual paperwork.
- Demonstrated strong problem-solving and development skills by successfully creating the functional prototype within the college environment.

Programming languages

- C Programming
- Java
- Sql

Version control

- Git

EXTRA-CURRICULAR ACTIVITES

- basketball
- tabletennis

HOBBY

- Chess
- Movies
- Songs

ACADEMIC PROJECT

CROP RECOMMENDATION SYSTEM

- **Our project aims to recommend the suitable crops to the end users**
- **The results will be based on the temperature, humidity, pH and other soil aspects.**
- **ML algorithm is used to predict the best crops with a dataset.**
- **We used Flask framework for this project and developed a web application for end users**

ANTI FUEL THEFT SYSTEM

- **anti-fuel theft system is a security mechanism designed to prevent unauthorized access to fuel stored in vehicles or fuel tanks**
- **It utilizes various technologies and features to deter, detect, and prevent fuel theft incidents**
- **These alarms are triggered when someone attempts to tamper with or forcefully open the fuel tank send notifications to the vehicle owner or security personnel.**
- **indicate fuel theft or leakage through notification**
